PROFILE

Second-year BSc Information Technology student at the University of Johannesburg, specializing in Computer Science and Informatics with distinction-level performance across both streams since first year. I build real-world software to learn — my portfolio spans Java desktop applications, ASP.NET MVC web applications, and Node.js REST APIs. I am seeking a software development internship where I can contribute, grow, and work alongside experienced engineers.

TECHNICAL SKILLS

Languages	Java · C# · C++ · Visual Basic · JavaScript · HTML · CSS · SQL
Frameworks	JavaFX · ASP.NET MVC 5 · Node.js · Express.js
Database	SQL Server · JDBC · Entity Framework 6 · T-SQL
Security	BCrypt · JWT Authentication · Role-Based Access Control
Tools & APIs	Git · GitHub · Swagger · REST APIs · Gson · Postman
Patterns	MVC · Repository · Unit of Work · Singleton · Observer
Concepts	Client-Server Architecture · Multi-threading · OOP · Normalization

PROJECTS

ThobaPlug — Real-Time Chat Application

Java · JavaFX · SQL Server · BCrypt · Gson

Multi-user real-time chat application built from scratch using Java Sockets and a multi-threaded server with ExecutorService thread pool. Features include BCrypt authentication, persistent chat history, live online user tracking, typing indicators, private messaging, and a professional JavaFX UI with FXML. Server logs all activity to file.

GitHub: github.com/edsonthobani-dev/ThobaPlug

MpangazithaBash — E-Commerce Web Application

ASP.NET MVC 5 · C# · Entity Framework 6 · SQL Server

Full-featured e-commerce platform with product catalogue, shopping cart (session-based), admin dashboard, and order management. Built using Generic Repository and Unit of Work patterns for a clean data access layer. Styled with Bootstrap and custom CSS.

GitHub: github.com/edsonthobani-dev/MpangazithaBash

NdabaneAPI — RESTful API

Node.js · Express · JWT · SQL Server · Swagger

Production-ready REST API with JWT authentication, role-based access control (RBAC), input validation, and full Swagger documentation. Designed for a university management system with endpoints for students, staff, and courses.

EDUCATION

BSc Information Technology · University of Johannesburg

2024 – 2026 (Expected)

Faculty of Science · Academy of Computer Science and Software Engineering

Specialization: Computer Science & Informatics

- Distinction in Computer Science 1A, 1B, 2A
- Distinction in Informatics 1A, 1B, 2A
- Additional modules: Calculus, Geography, IT Management

KEY STRENGTHS

Portfolio-driven learner Three full-stack projects built independently	Multi-language developer Java · C# · JavaScript across different stacks
Security-conscious BCrypt, JWT, RBAC, PreparedStatements	Consistent GitHub contributor Active public profile with documented projects
